

Mirage Medical Clinic

Beyond her thirties a woman's best kept secret was always her age. Today, it is more likely to be how she managed to look younger than her years.

Key milestones in a woman's life that cause her to examine her facial appearance are the resumption of a career after raising a family, working with younger people, coping with divorce or bereavement or merely facing the fact that at a time in her life when she has more time and money to spend on herself, her face shows permanent lines that even the most skilful make-up cannot hide.

The ageless good looks of film and television personalities may, in some cases, be attributed to surgery, never to luck, but often to something called 'Collagen Instant Therapy'.

Since the mid-70s, this simple non-surgical procedure has been available which eliminates age lines and scars in just a few minutes and the effects last for approximately 6 months. Small amounts of Collagen which is a natural protein are injected very superficially along the lines where the skin's own collagen has lost its natural elasticity. The treatment can be repeated for as long as the client wishes to keep the years at bay.

These days a new generation of sugar-based dermal fillers are also available called Restylane and Hylaform. These are administered in the same way as Collagen.

These treatments are administered by a fully trained member of the Mirage Medical Team who will visit Arcana Spa @ Crownhill on a regular basis. Mirage work with selected salons throughout the UK and are considered to be leaders in the field of dermal fillers.

All clients at Arcana Spa will receive a free consultation. For an appointment call 01908 261040 or Mirage direct on 01455 556313
